DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, it is not clear what the second piezoelectric sensing element is coupled to. In claims 1 and 11, it is not clear to what the feedback is being provided.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-9, 11-14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al.

With respect to claims 1-4 and 11-14, in **fig. 2** the reference discloses a first **30a** and a second **28a** piezoelectric elements on a movable member **20**. It is the Examiner's position that any fluid parameter would necessarily affect the motion of the movable member **20** and thus necessarily affect the feedback **37**. The method is necessitated by the structure.

With respect to claims 6 and 7, the movable member **20** is a flexible blade.

With respect to claims 8, 9, and 16, the reference discloses a controller and a power source in **fig. 2**.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 15 rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada et al.

In **fig. 2** the reference discloses a first **30a** and a second **28a** piezoelectric elements on a movable member **20**. It is the Examiner's position that any fluid parameter would necessarily affect the motion of the movable member **20** and thus necessarily affect the feedback **37**. The method is necessitated by the structure.

The reference does not disclose that the use of two different piezoelectric materials.

The Examiner takes Official Notice that the properties, electrical and mechanical, of a variety of piezoelectric material would have been known. It would have been obvious to one of ordinary skill in the art to use two different material in the device of Yamada et al for the purpose of obtaining different mechanical responses from the movable member **20**. Further, two different piezoelectric materials would have different coefficients of thermal expansion.
